En las últimas décadas, la movilidad de personas tanto a nivel nacional como internacional ha abierto nuevas dimensiones en el análisis del fenómeno migratorio que no se ubican en la concepción tradicional de la migración entendida como cambio de residencia. En este sentido, el dinamismo de los movimientos humanos ha planteado la necesidad de hablar de la movilidad de la población como el gran abanico que incluye no sólo la migración, sino los desplazamientos de corta o larga duración que no implican ningún cambio de residencia (p.7).

In conclusion and paraphrasing should not have the page number.

Example, CONAPO (2018) has reported that the cost of transit through Mexico to reach the United States increased in the last years.
